Visual Design Submission – AI Travel Planner App
Name: Nanle Joseph Lengya
Track: UI/UX Design
Project Title: AI Travel Planner – Full High-Fidelity UI Design

Summary of My Design Work
In this project, I transformed my entire wireframe into a high-fidelity UI for an AI-powered Travel Planner app. I applied visual design principles such as hierarchy, contrast, spacing, and consistency across all core screens in the user journey.

My final design includes:
- Splash & Onboarding
- Authentication (Sign In, Sign Up)
- Trip Input Form
- AI-Generated Itinerary
- Customize Itinerary
- Trip Summary
- Save/Share Modals
- My Trips
- Profile & Settings

I also created a style guide within the Figma file that outlines my design system.

Visual Principles I Applied
· Hierarchy: Used bold Clash Display headings and colored CTA buttons to draw attention to actions
· Contrast: Ensured text is dark over light backgrounds and buttons use high-contrast colors
· Spacing: Followed an 16×8px spacing system throughout for padding, margins, and layouts
· Alignment: Used Figma's grids and auto layout to align content cleanly
· Consistency: Reused buttons, form fields, and card styles across all screens
· Clarity: Removed clutter, used whitespace, and focused each screen on one main action

Challenges I Faced
- Managing space on small mobile screens while keeping things readable
- Choosing accessible color contrast with my olive green brand (#3B4A20)
- Making icons, buttons, and cards feel consistent without overdesigning

Improvements Over My Wireframe
- The wireframe had a solid structure, but felt basic and flat
- The new design introduces a clean, consistent look and stronger branding
- Visual cues guide the user more clearly from screen to screen
- The user experience is now more intuitive and aesthetically appealing

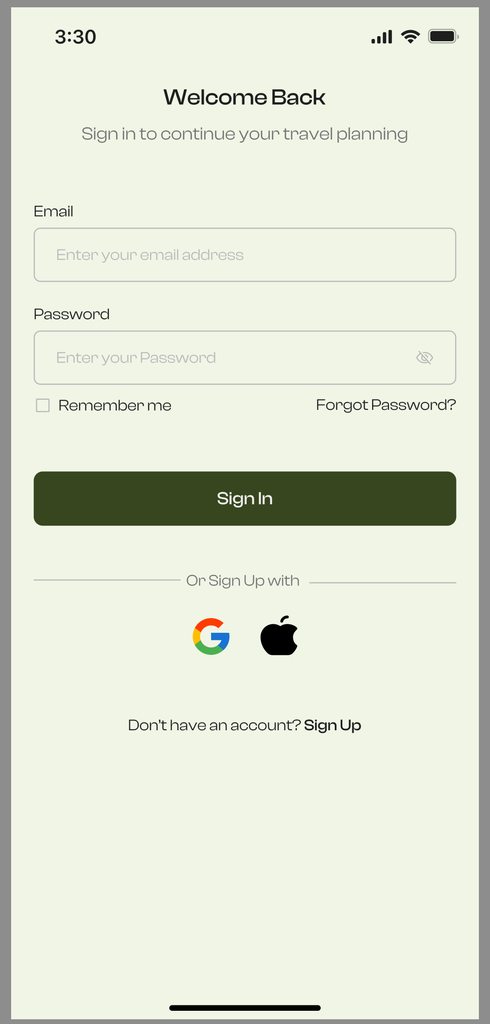

Welcome Screen

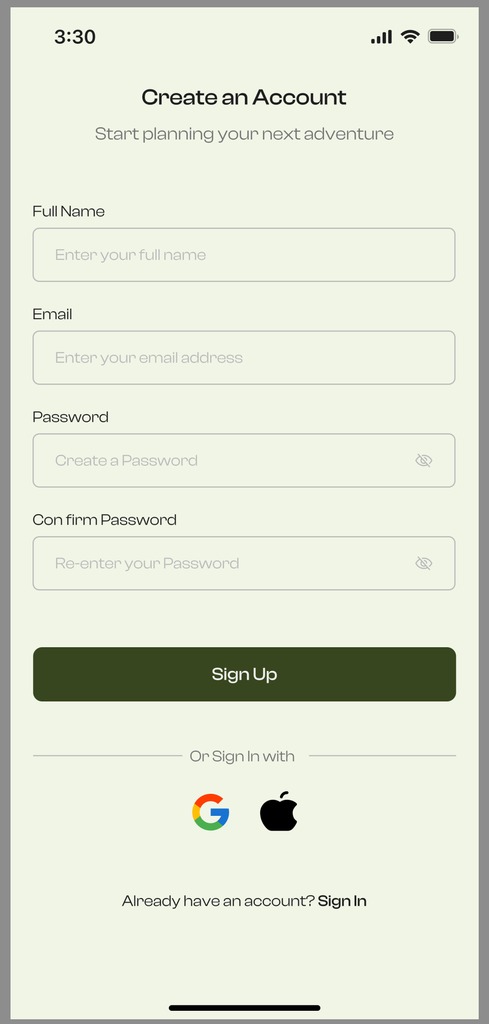

Splash screen introduces the app name using brand typography (Clash Display) and center alignment."

"Primary CTA 'Get Started' styled with olive green and centered alignment."

Sign In Screen

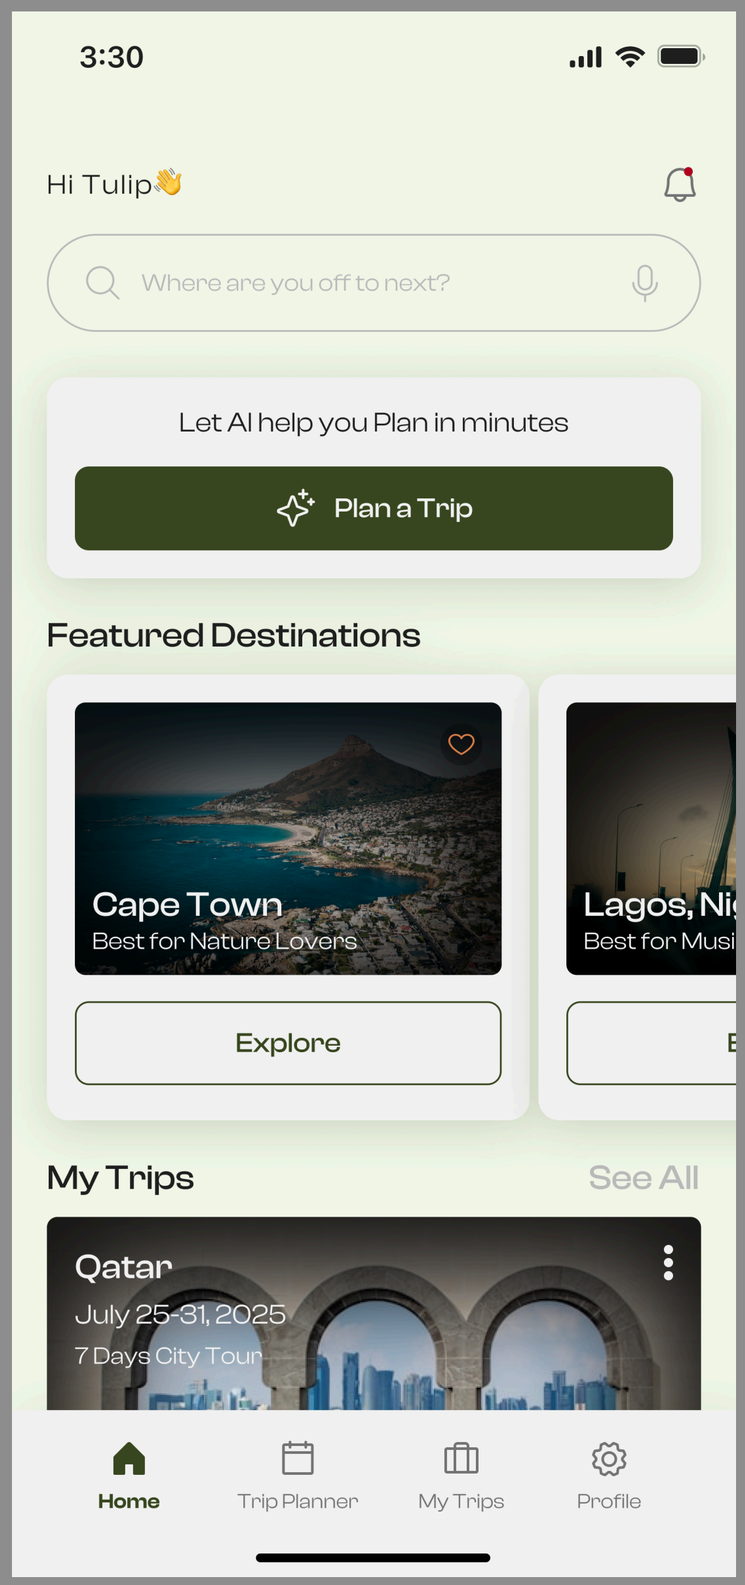

Sign Up Screen

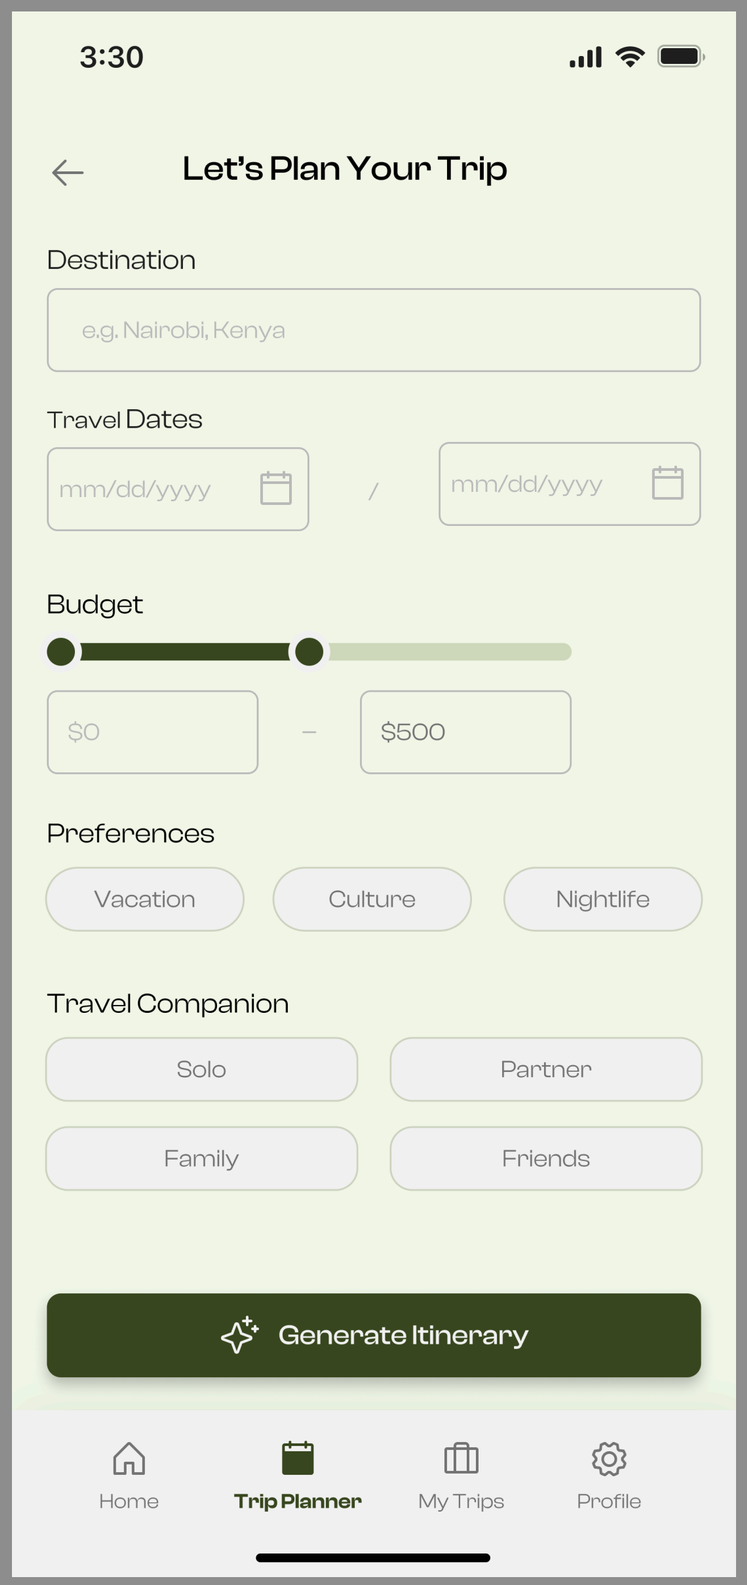

Sign In / Sign Up Screens
"Form inputs aligned vertically with consistent 16px padding."
"Used placeholder text to guide user input."
"Clash Display used for headings; smaller font for helper text."
"Buttons use consistent style: rounded corners, centered text, brand color."

Home Screen

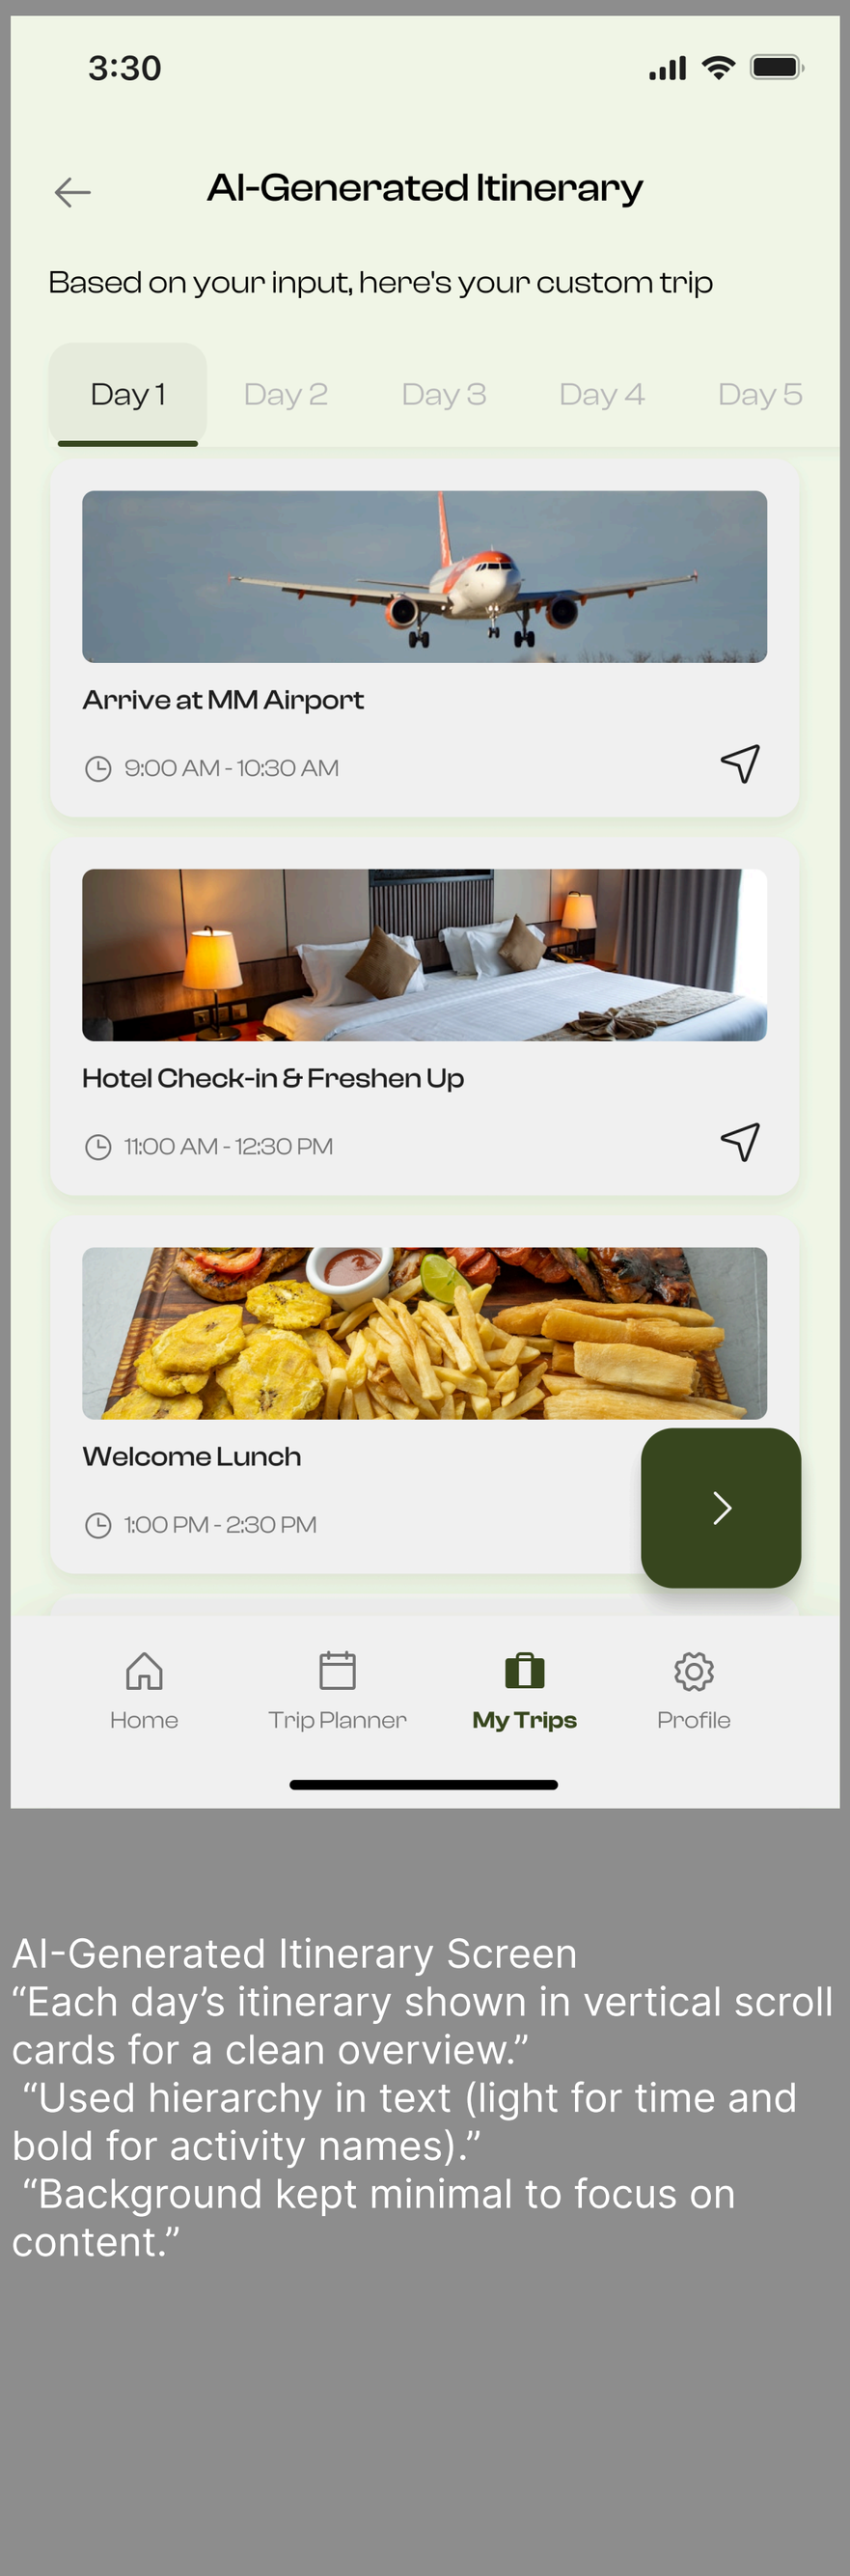

Home Screen
“Header area introduces friendly greeting and destination search bar.”
“Popular destinations displayed using cards with image, title, and CTA.”
“Cards follow consistent spacing and styling with image ratio maintained.”

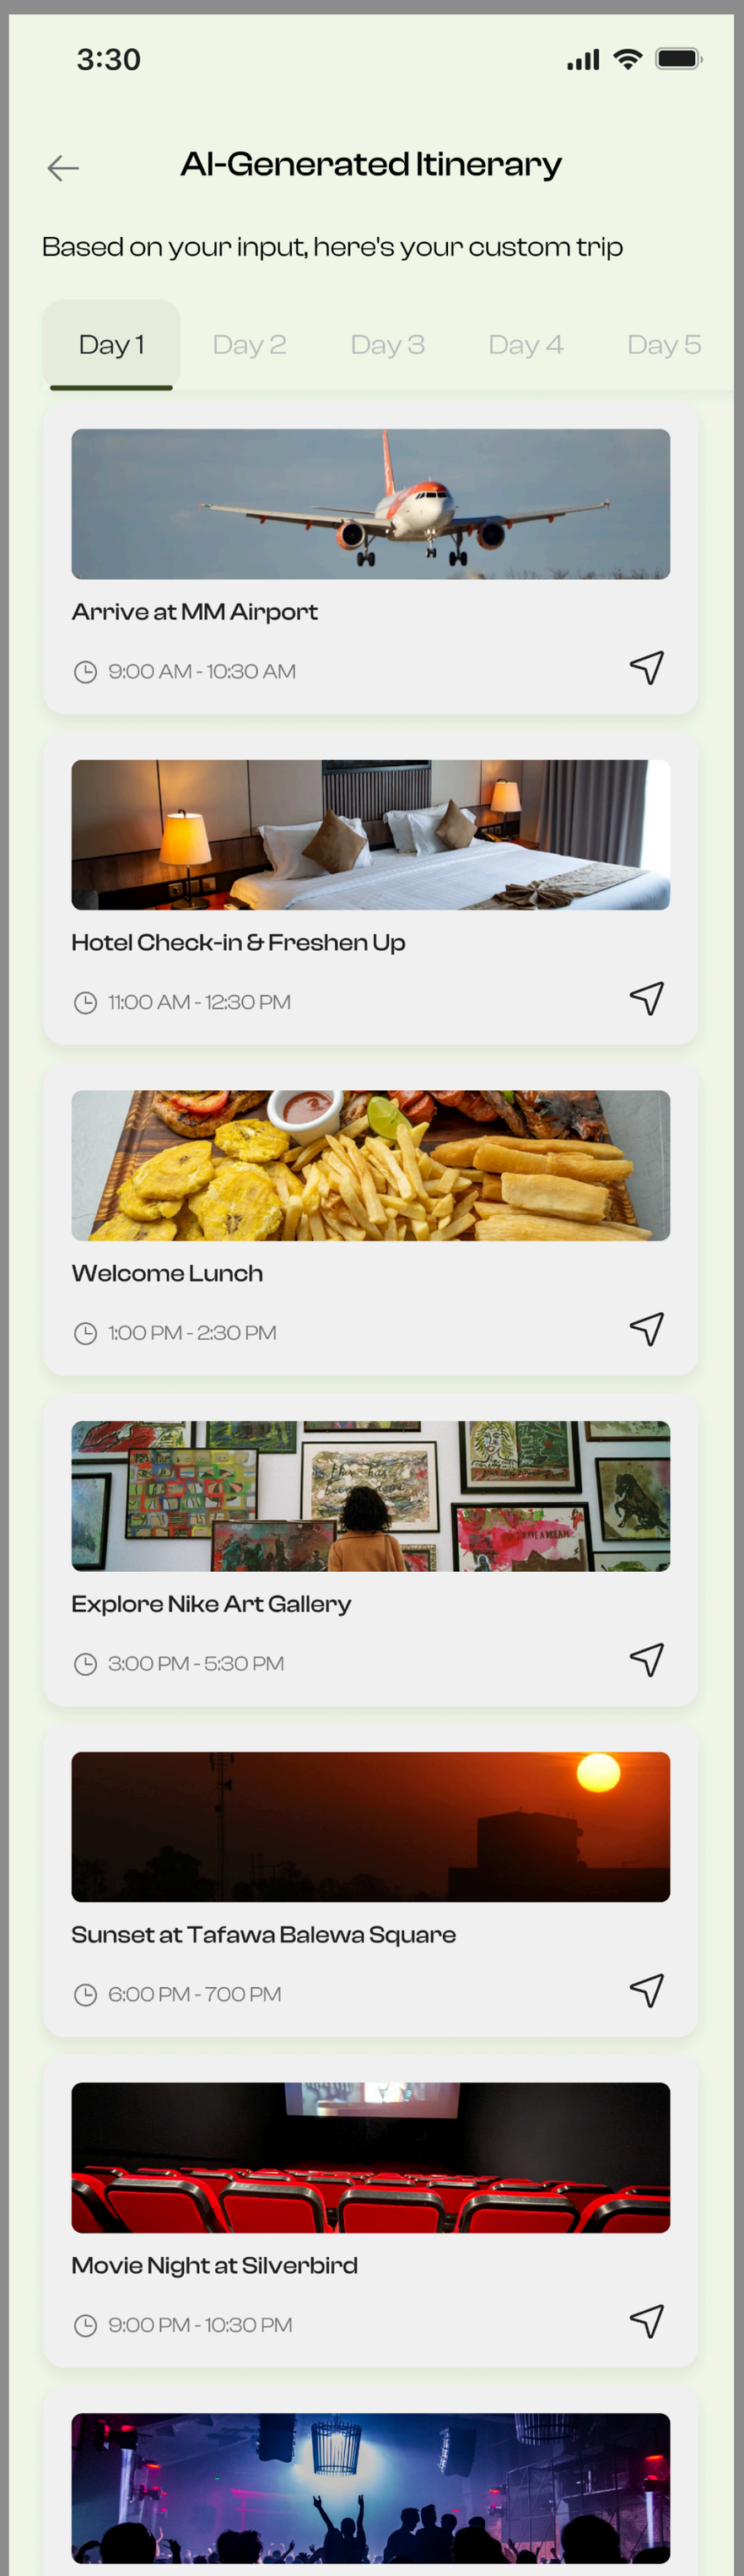

Trip Input Screen

Trip Input Form
“Form broken into sections for easy scanning (e.g., Destination, Dates, Preferences).”
“Icons used for contextual cues (e.g., calendar).”
“Primary CTA button ‘Generate Itinerary’ is prominently placed at the bottom.”

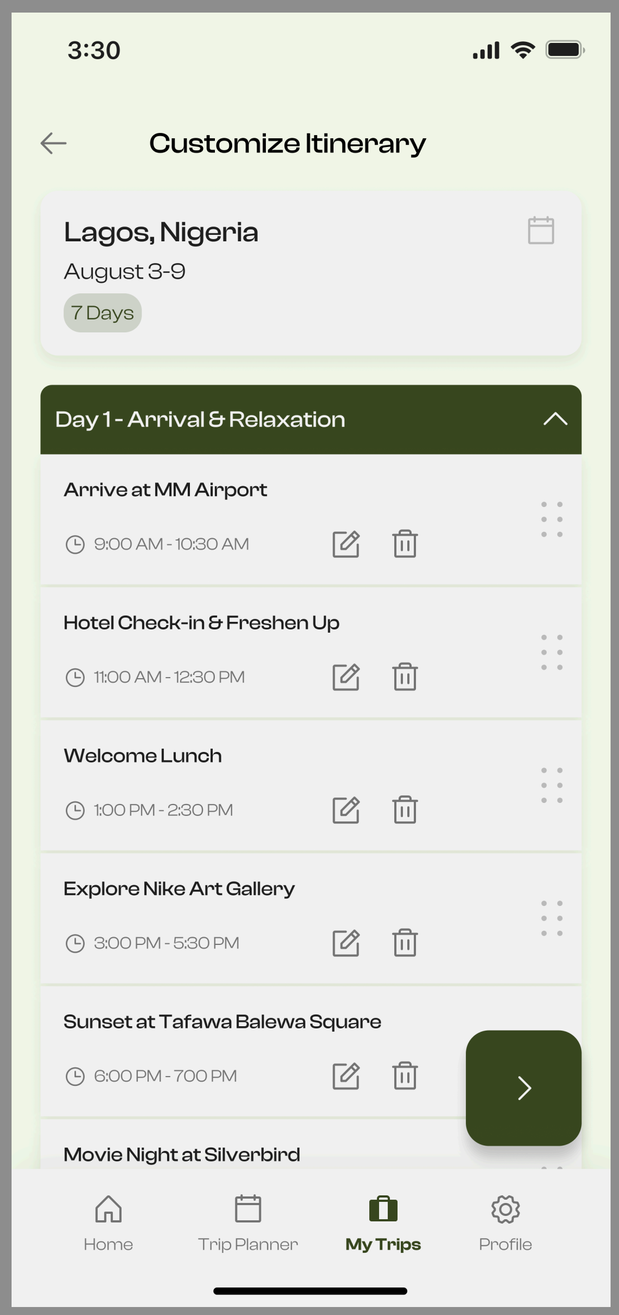

Ai-generated itinerary Screen

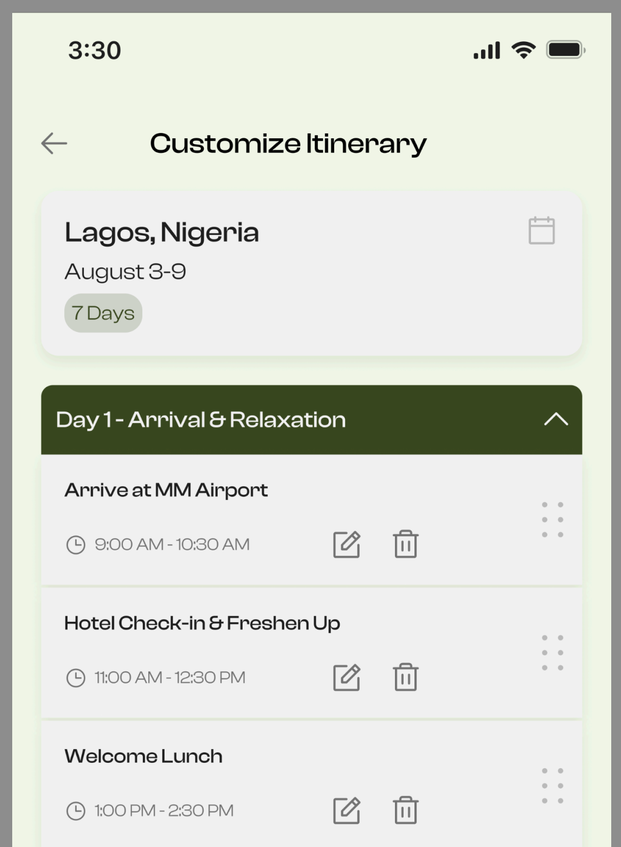

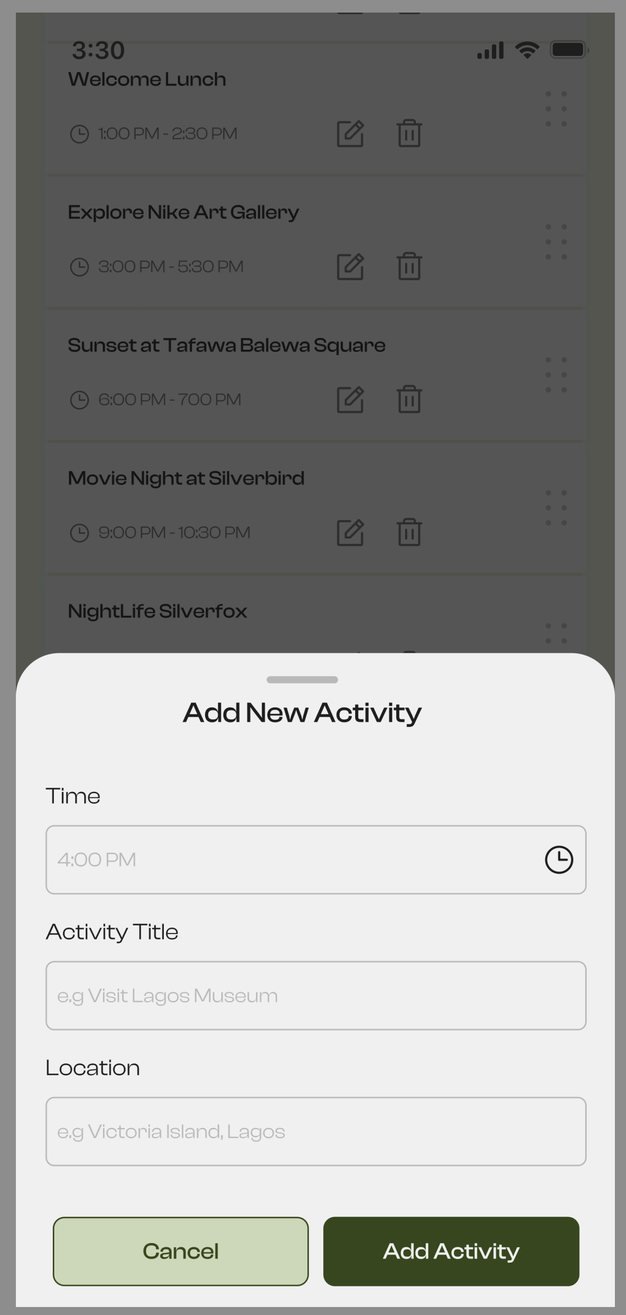

AI-Generated Itinerary Screen
“Each day’s itinerary shown in vertical scroll cards for a clean overview.”
“Used hierarchy in text (light for time and bold for activity names).”
“Background kept minimal to focus on content.”

Customize Itinerary Screen

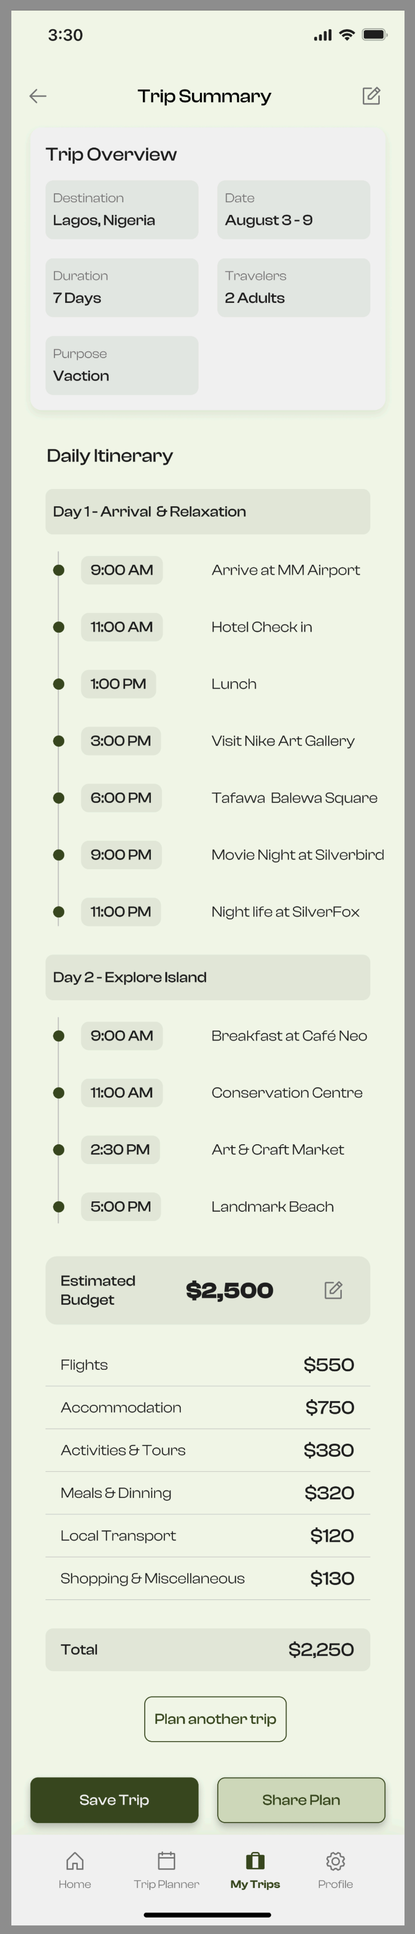

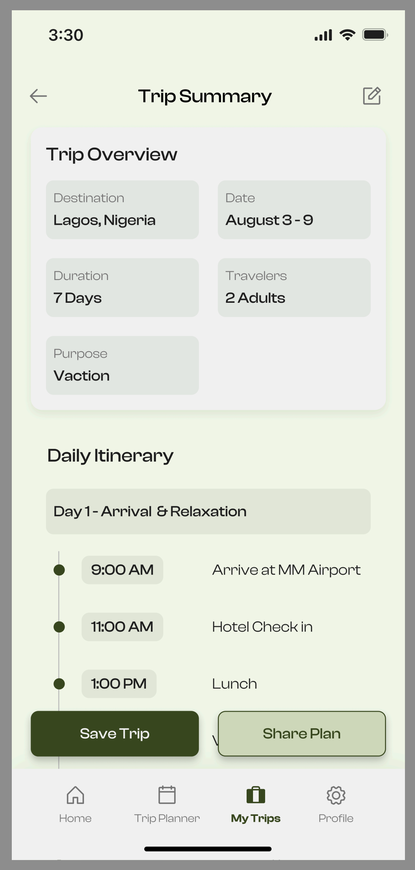

Customize Itinerary Screen
“User can edit or remove sections from the generated trip.”
“Used icons like trash/delete for clarity.”
“Each itinerary card uses consistent structure: activity name, time, edit options.”

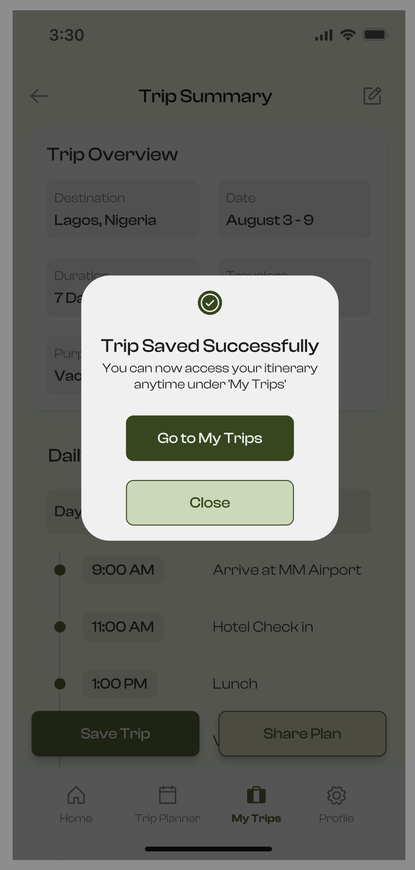

Trip Summary Screen

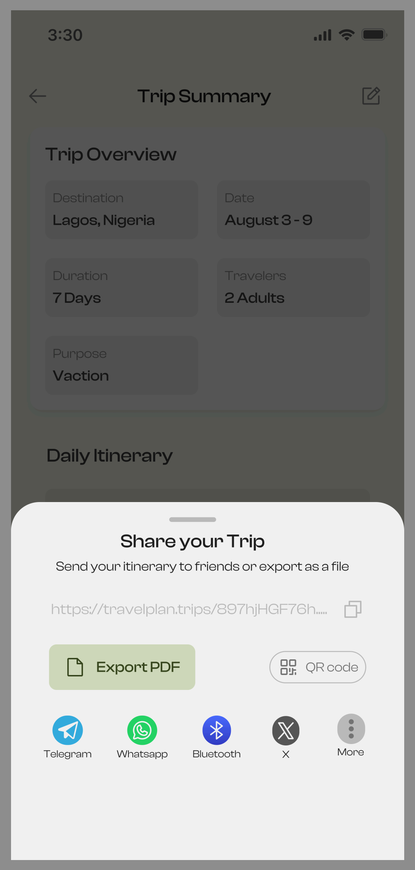

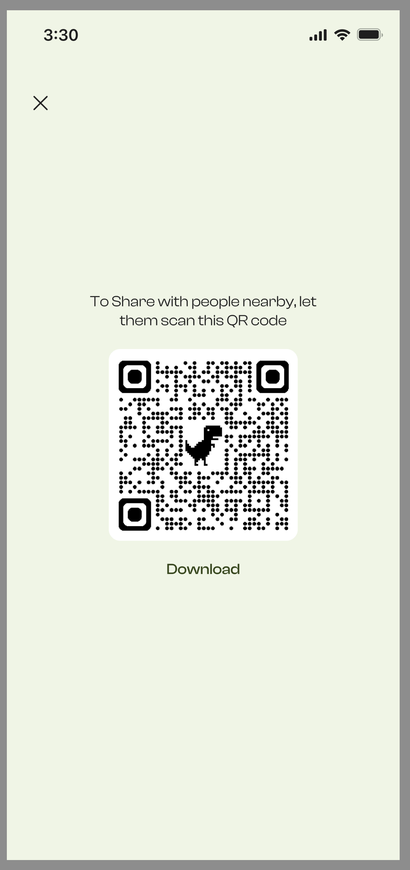

Trip Summary Screen
“Trip overview includes budget, dates, and main highlights.”
“Summary grouped into visual blocks for easy review.”
“CTA options placed at bottom: Save & Share.”

Save/Share Screen

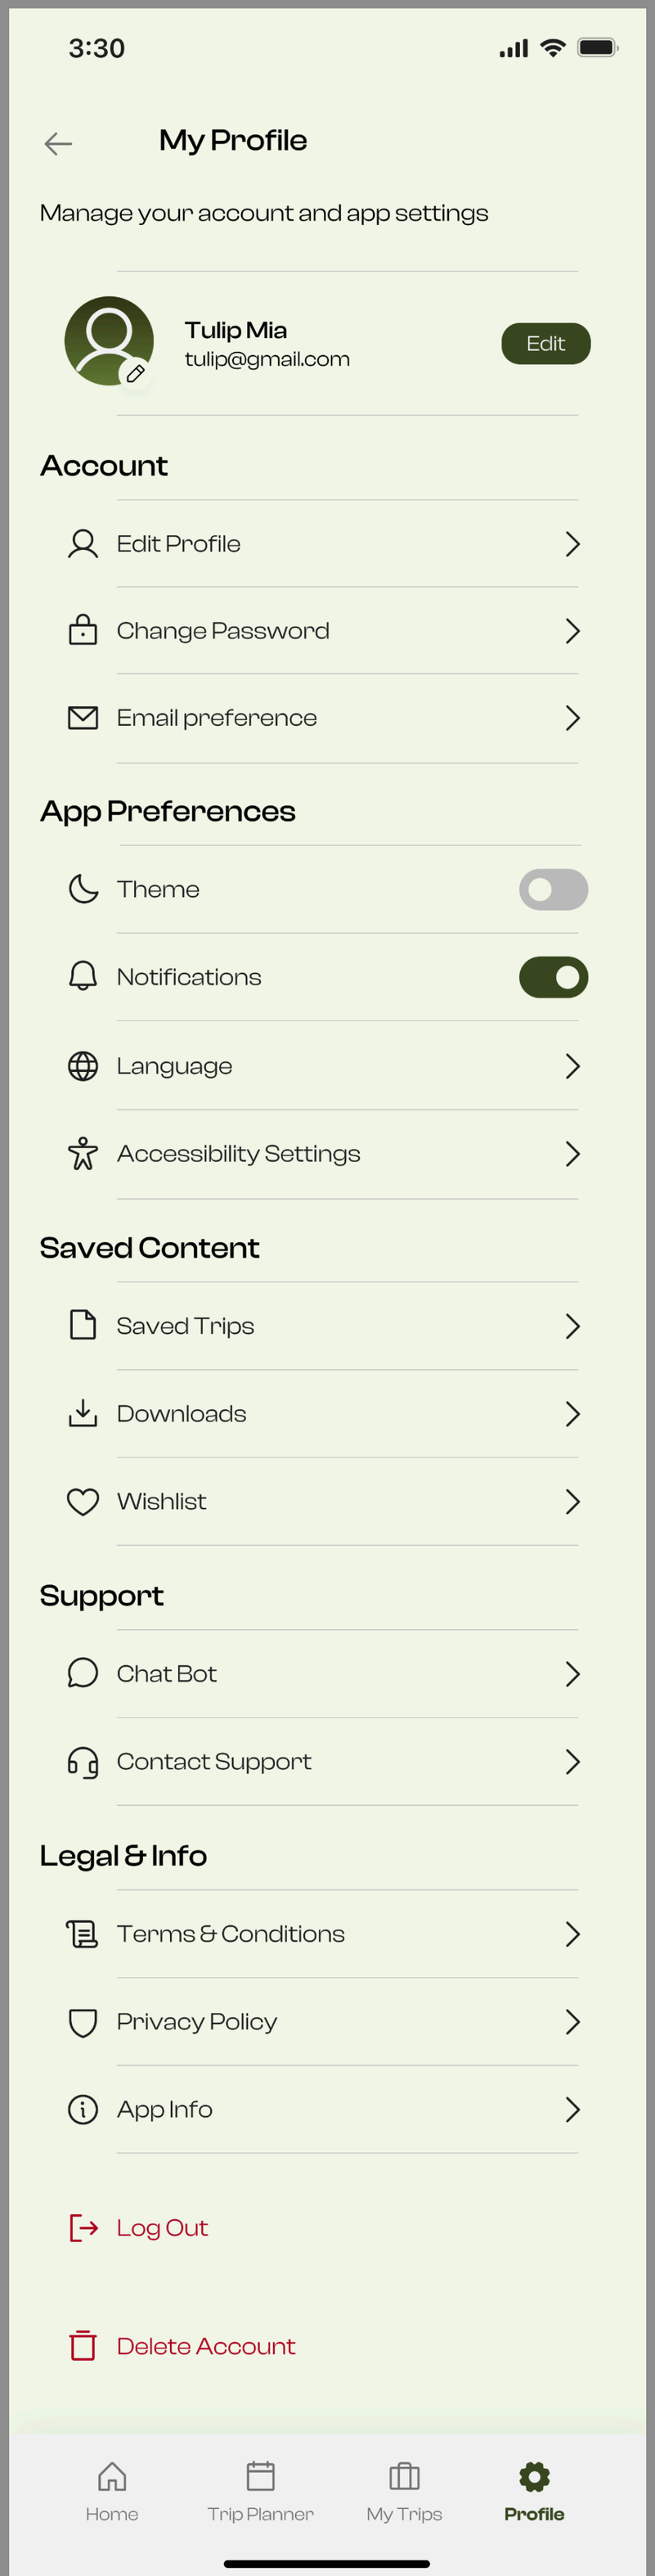

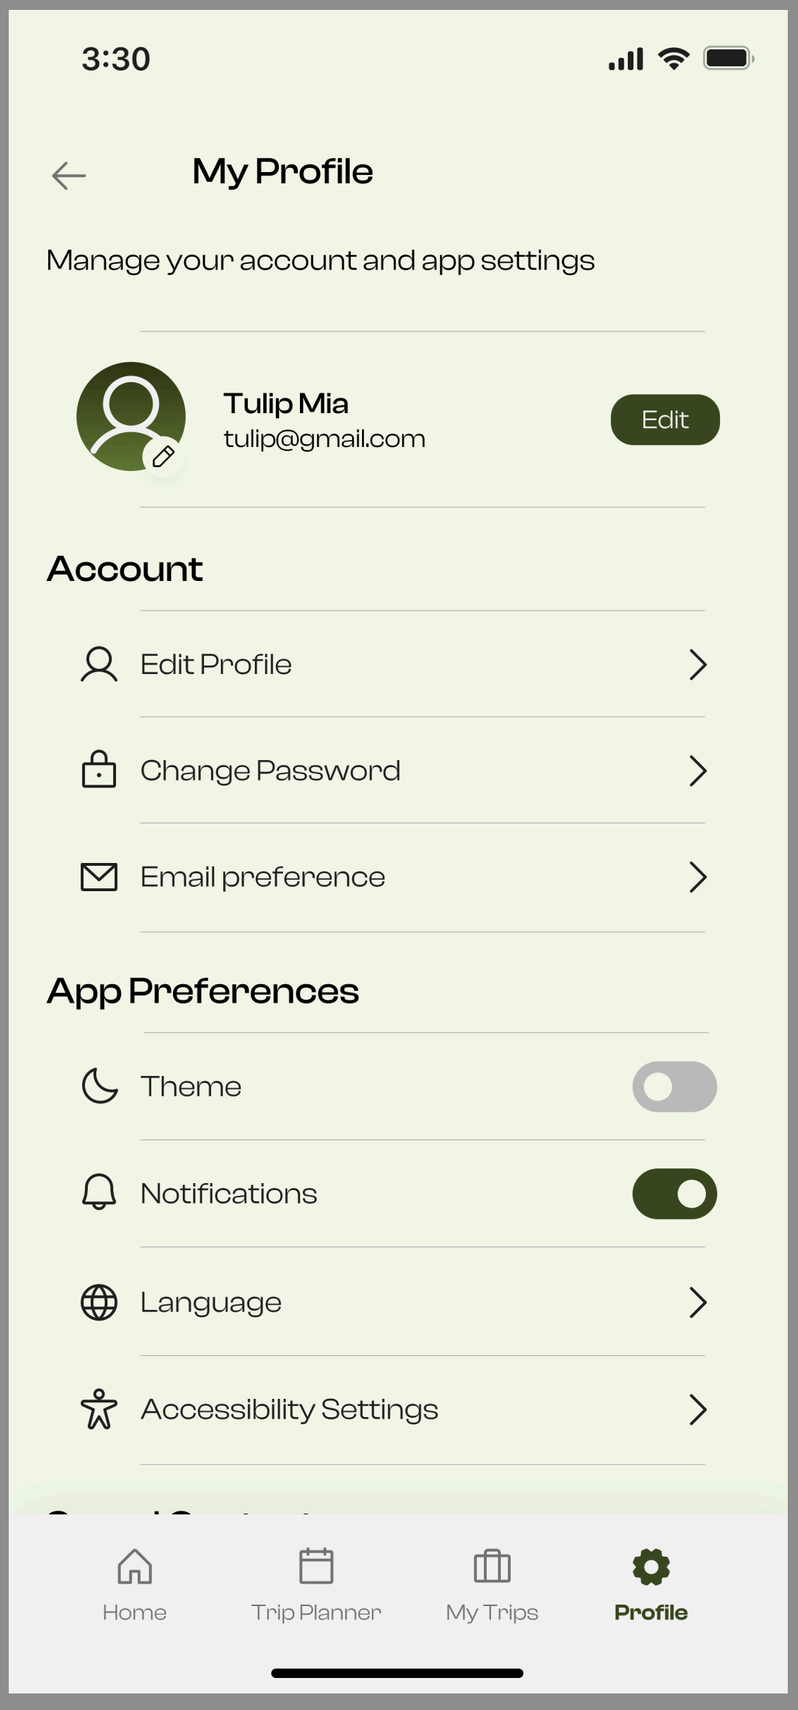

Save / Share Modals
“Confirmation modal overlays centered with blurred background.”
“Buttons styled consistently with CTAs above.”
“Minimal text used for clarity — action-focused language.”

Profile/Summary Screen

Profile & Settings Screens
“Profile screen includes user info at top, followed by navigation links.”
“Settings grouped under clear headings: Account, Preferences, Support.”
“Included options like ‘Accessibility’, ‘Delete Account’ for completeness.”
“Bottom navigation bar active state styled using brand color.”

Navigation
“Bottom navigation bar includes icons and text for Home, Trip Planner, My Trips, Profile.”
“Current page is highlighted using filled icon and olive green color.”
