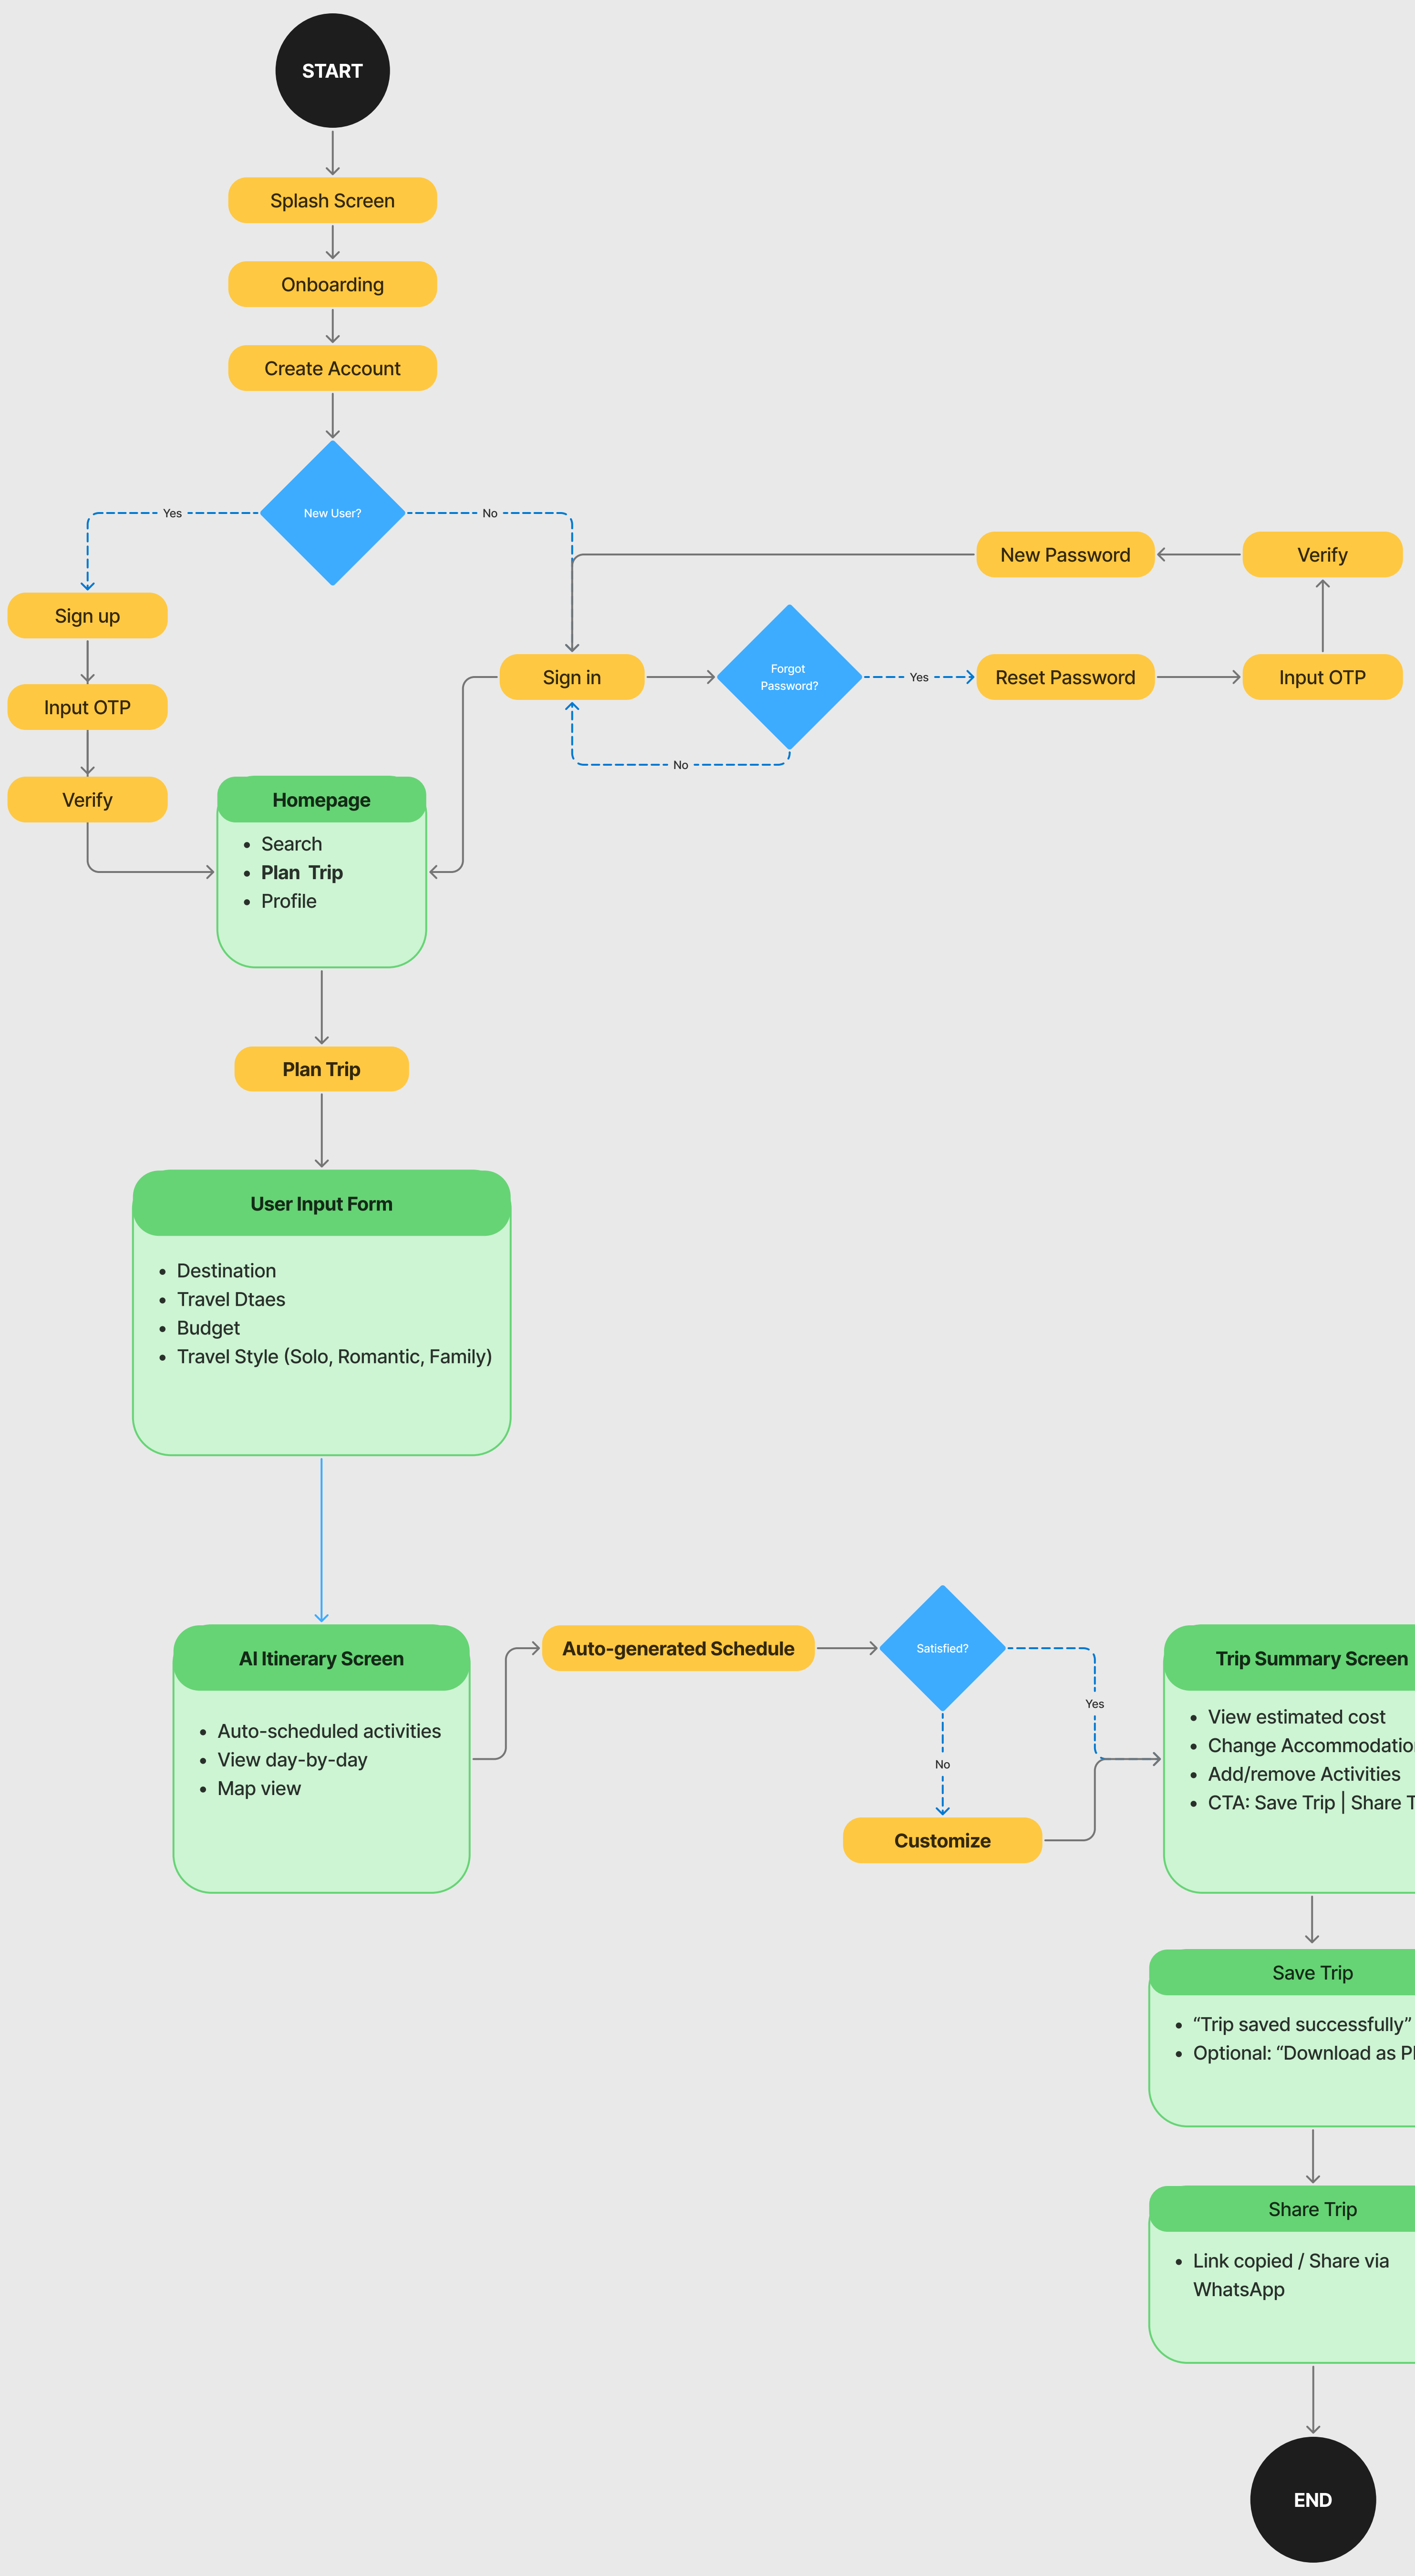
Wireframe

1. USER FLOW



2. USER JOURNEY MAP (Anabel Jones – Mobile Use Case)

Stage	Discovery	Onboarding	Trip Planning	Customization	Sharing & Saving	Post-Trip Engagement
User Actions	Sees IG Ad → Clicks App Store	Installs App → Google Auth Sign In	Inputs destination, dates, budget	Edits activities & accommodation	Saves and shares itinerary	Gets trip summary notification
Thoughts	"Looks unique"	"Quick setup is nice"	"Let's see what it suggests"	"Not everything fits my vibe"	"Looks polished!"	"I want to reuse or refer a friend"
Emotions	😍Curious, Intrigued	🙂Cautiously optimistic	😊Impressed, Hopeful	😕Slightly stressed but in control	😎Proud, Confident	😊Reflective, Grateful
Pain Points🔴	Feels generic	Too many fields	Generic suggestions, no previews	No instant preview	No save-to-gallery/PDF Download	No re-engagement
Opportunities🟢	Show testimonials	Enable "Skip & Set Later"	Explain suggestions ("Based on interests...")	Toggle itinerary types (chill, foodie, etc.)	Add "Download as PDF" / "Create Reel"	Offer referral points / trip memory feed
Touchpoints	Instagram Ad → App Store	Welcome screen → Google Login	Input Form → AI Suggestions	Edit Modal, Day Breakdown	Save Trip, Share Modal	Notification → Feedback Screen
Accessibility	High-contrast CTA buttons	Screen reader-friendly form fields	Voice input on destinations (microphone icon at the top of homepage)	Zoom support on map view	Clear button sizes, captioned sharing modal	Feedback screen has large tap targets
